

An aerial night-time photograph of a multi-lane highway. A single car is visible in the middle of the road, with a bright red laser line extending from it across the lanes. The scene is illuminated by streetlights, creating a dark but visible environment.

“Leading the transition to an electric vehicle society”

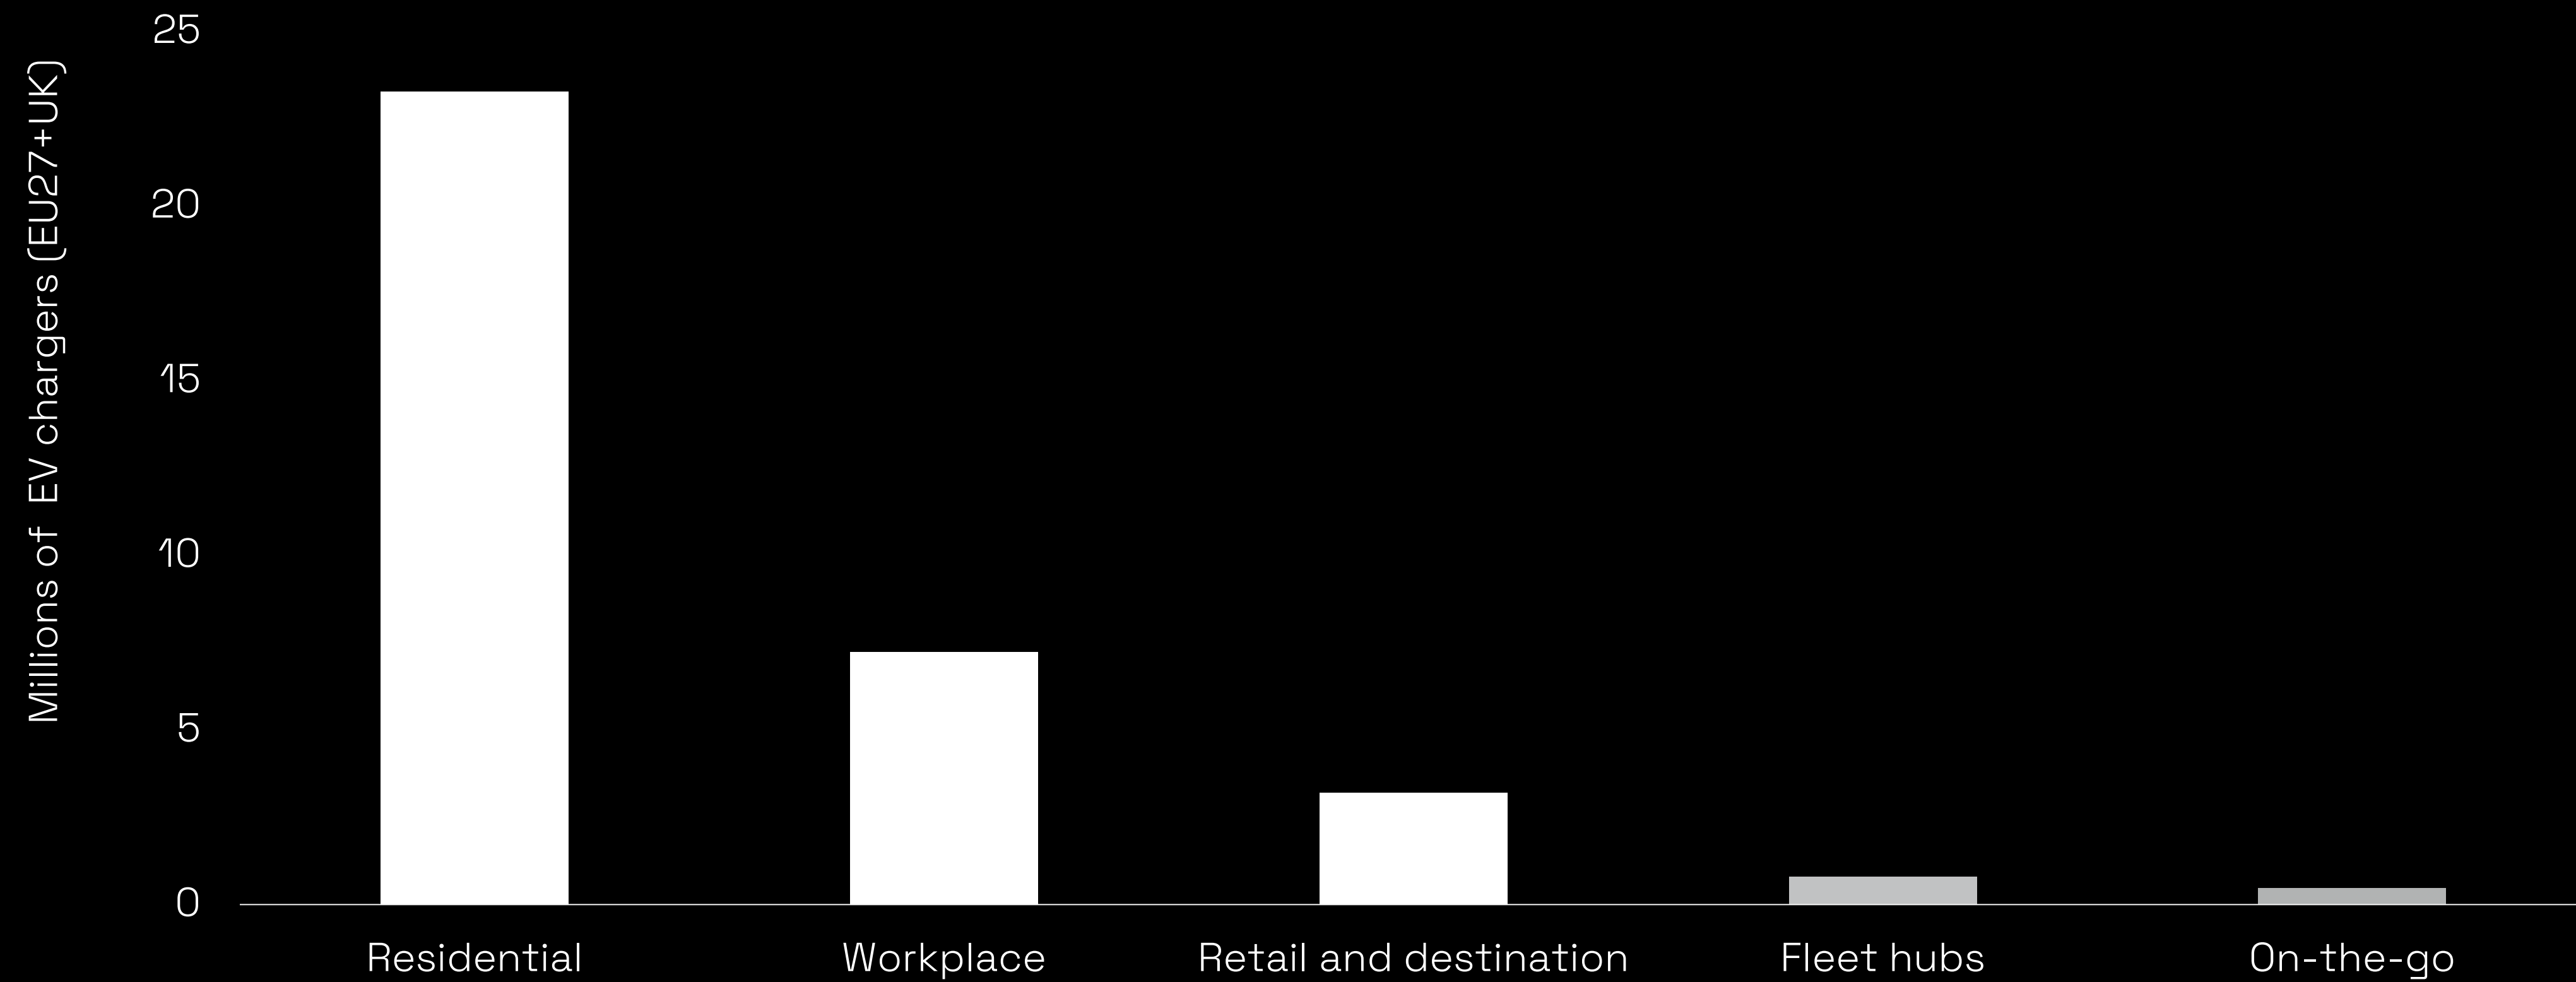

IoT Gathering Sweden 2023

Connected vehicles to the grid  
for 60 years

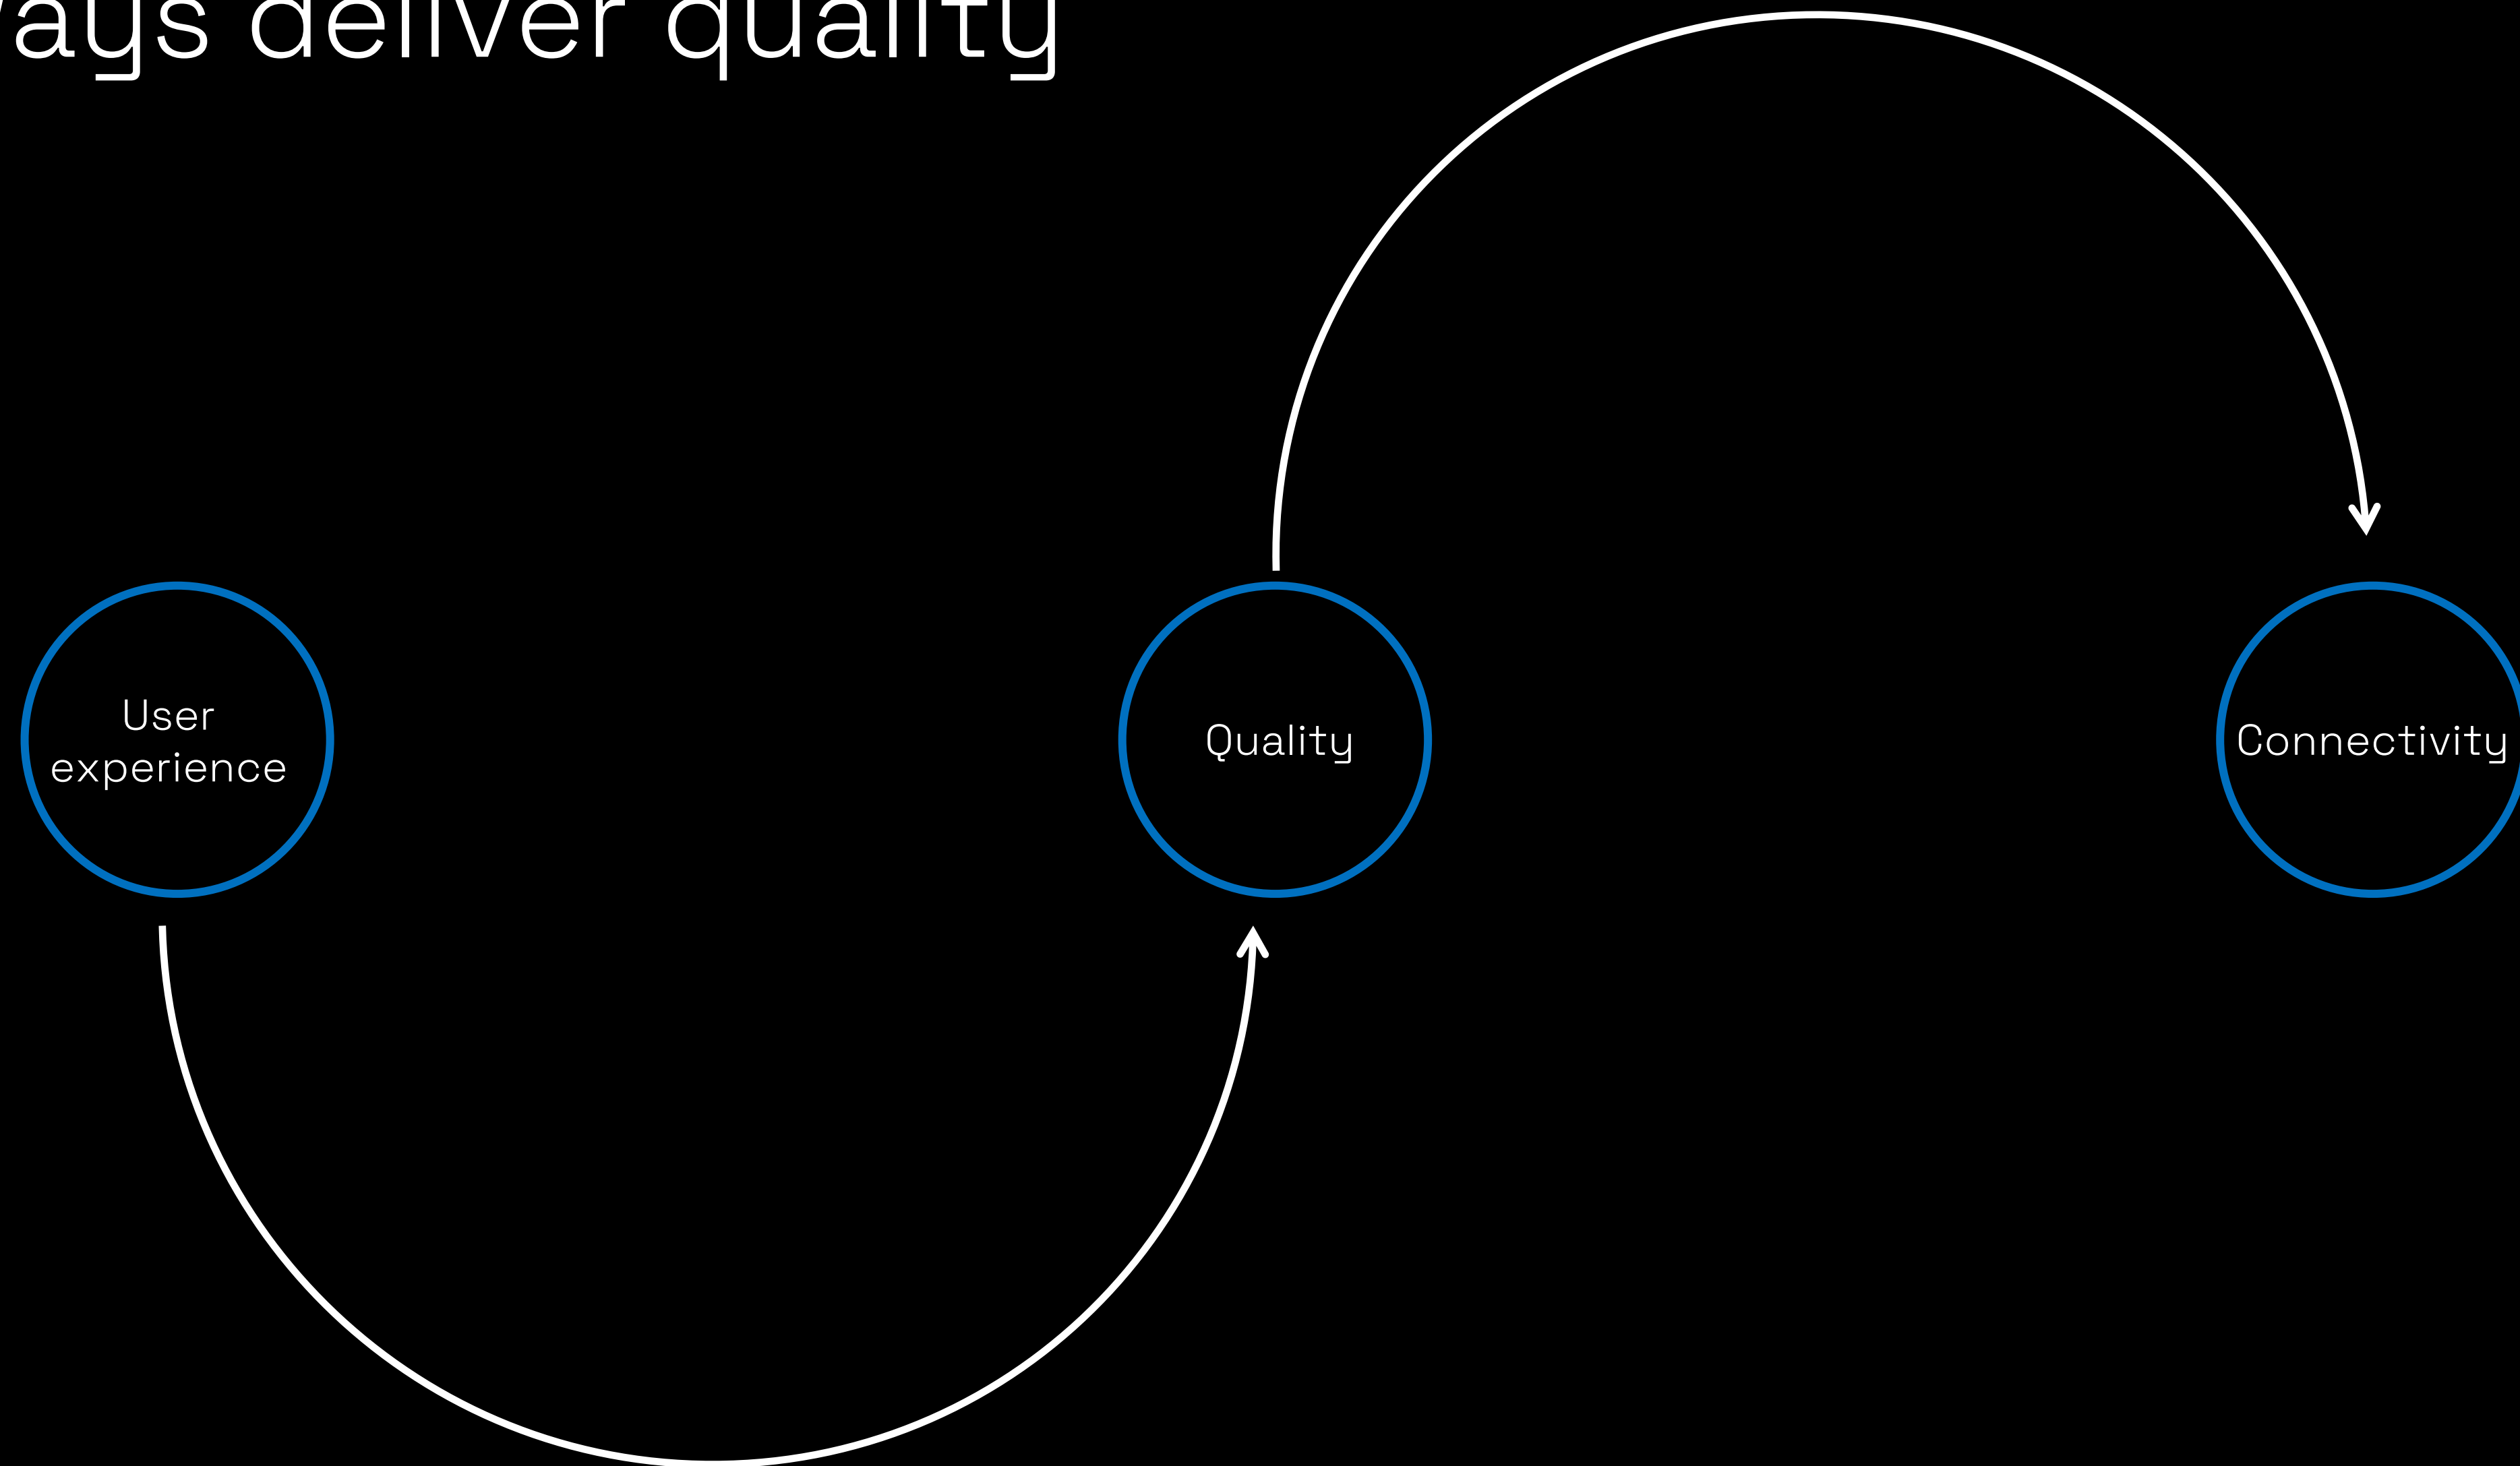

# +90% of all chargers are AC charging

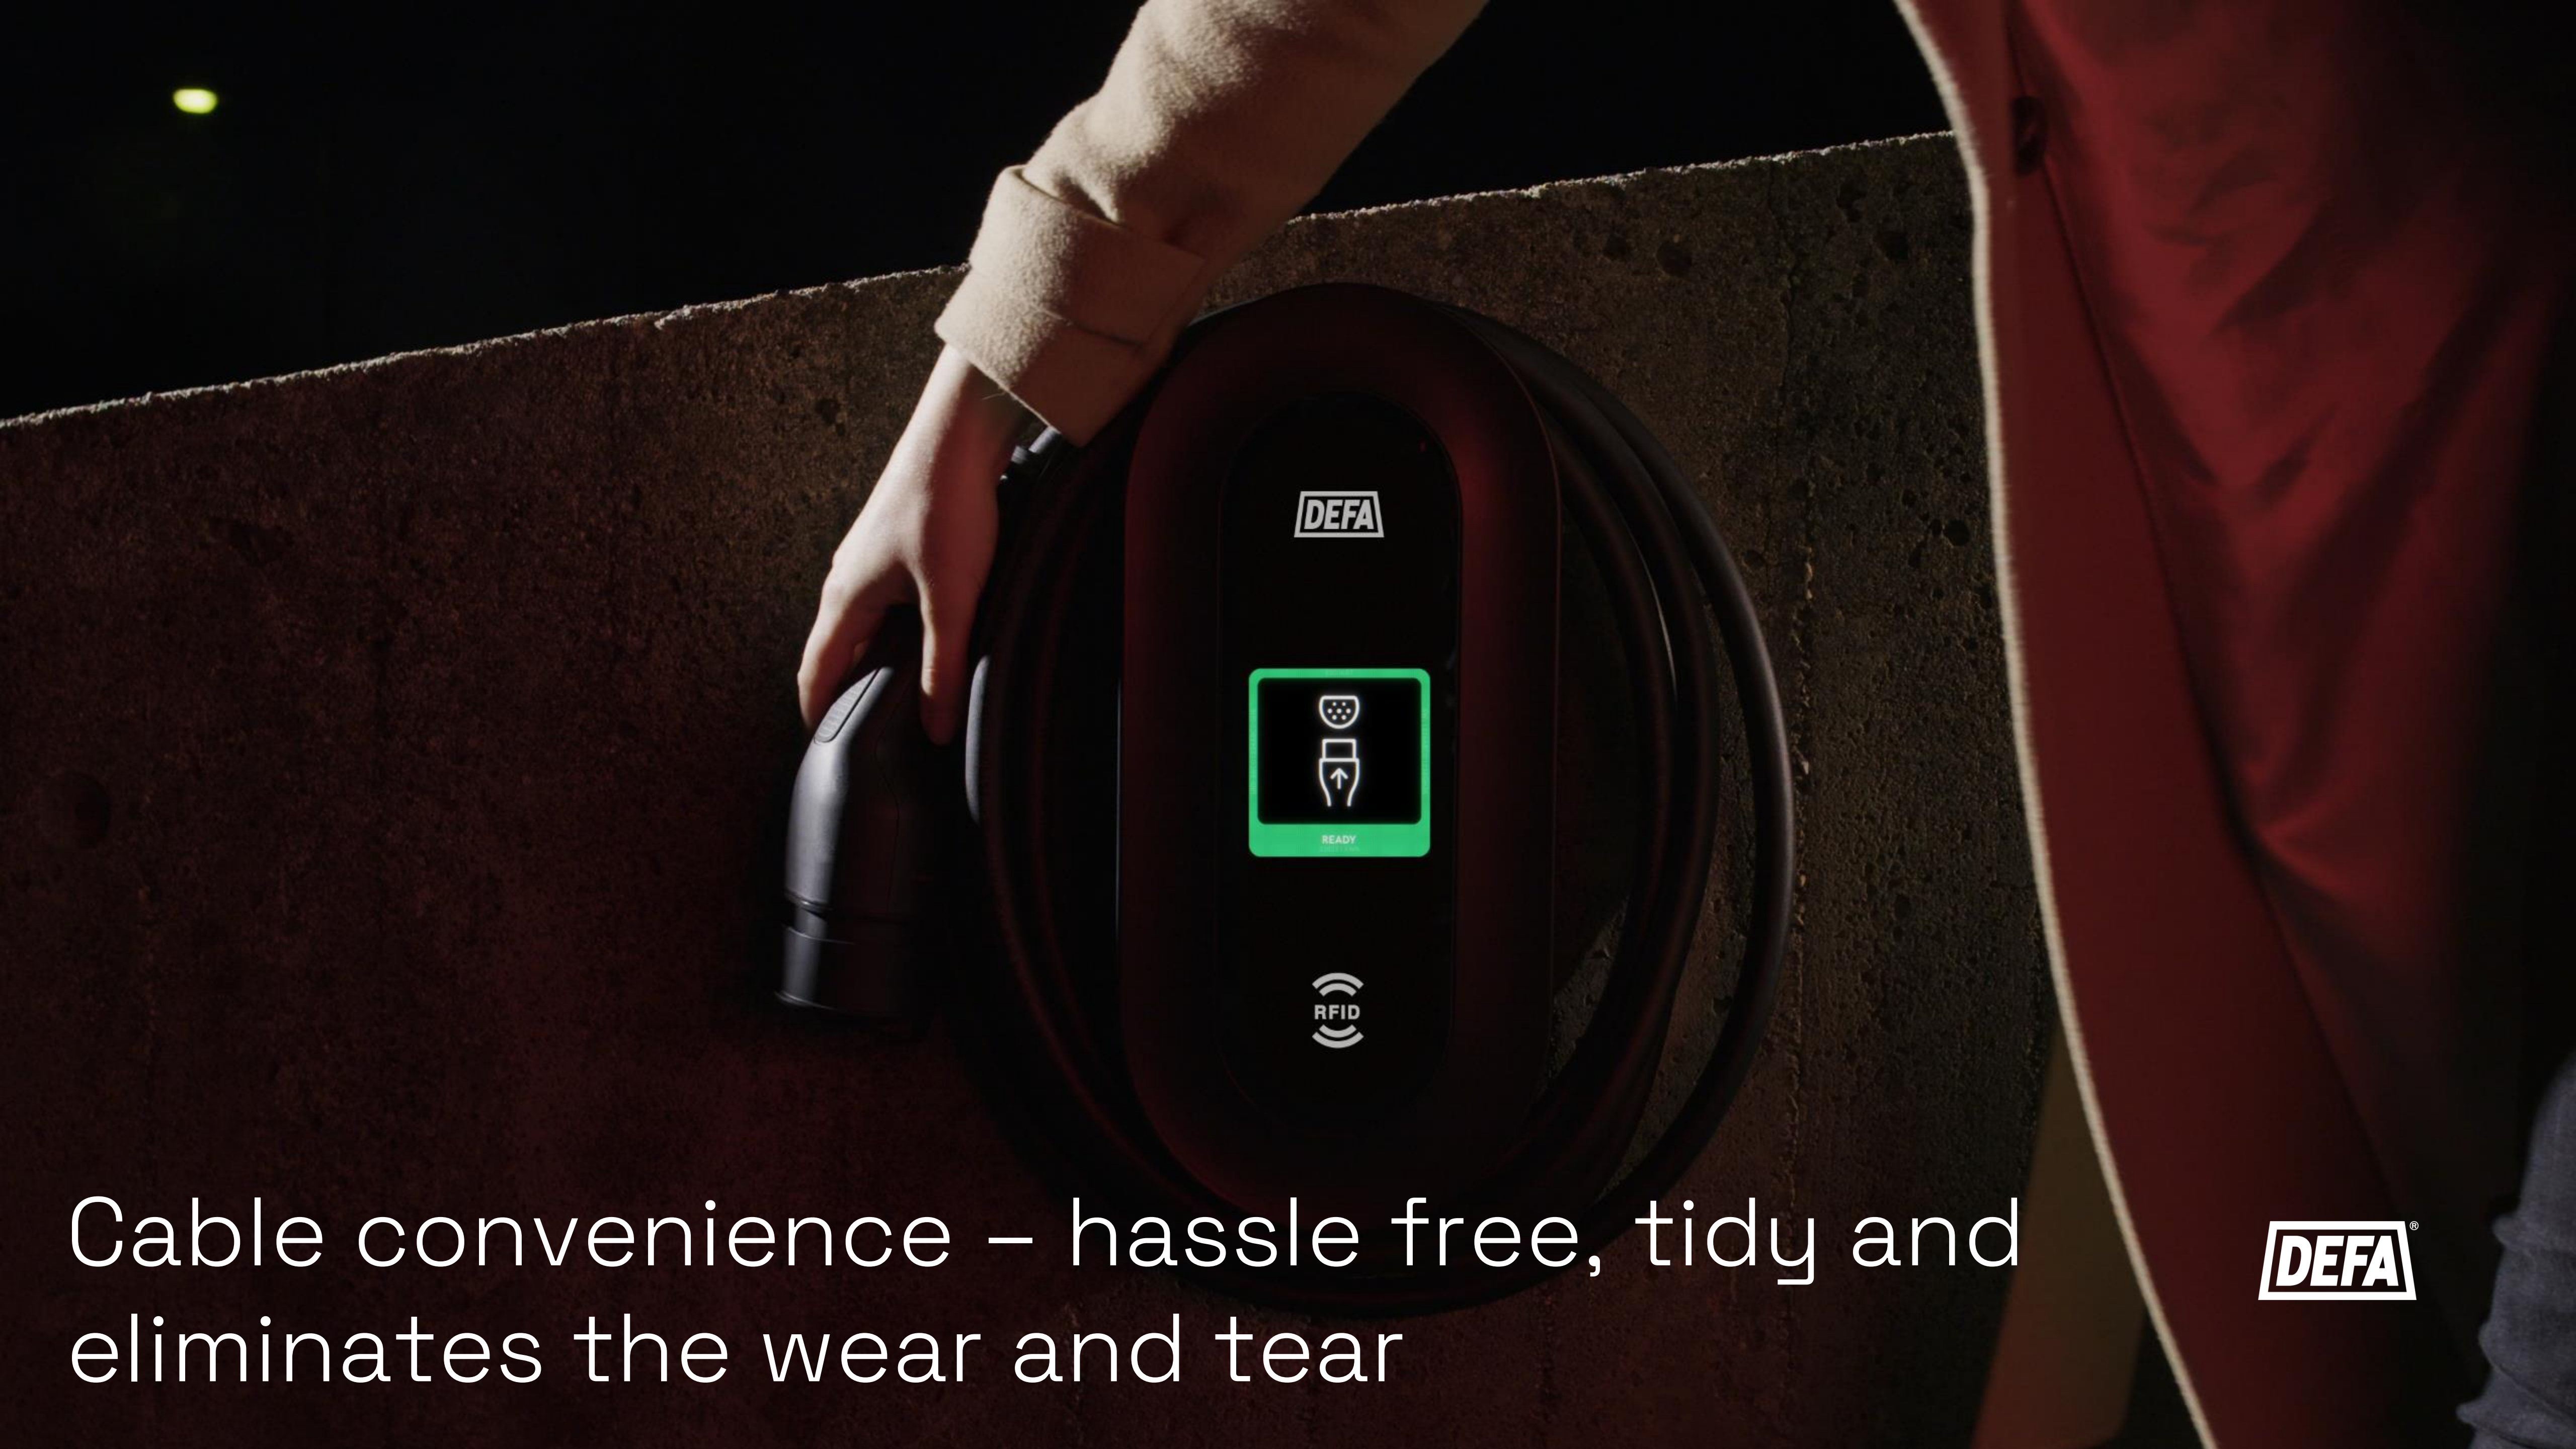

**DEFA**<sup>®</sup>

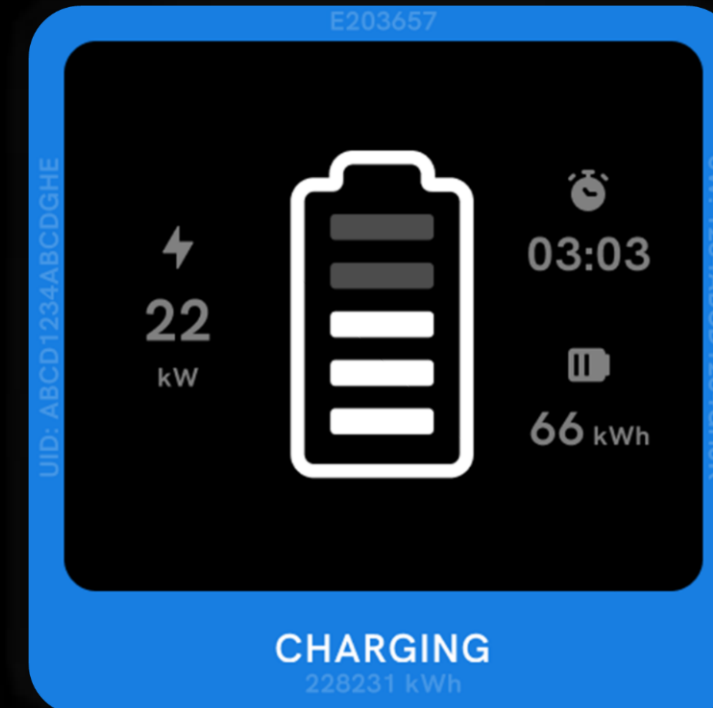

Make the best charging experience and  
always deliver quality

Cable convenience – hassle free, tidy and eliminates the wear and tear

Display – guidance throughout the entire charging session

Certainty of power – deliver what's promised  
and never derate

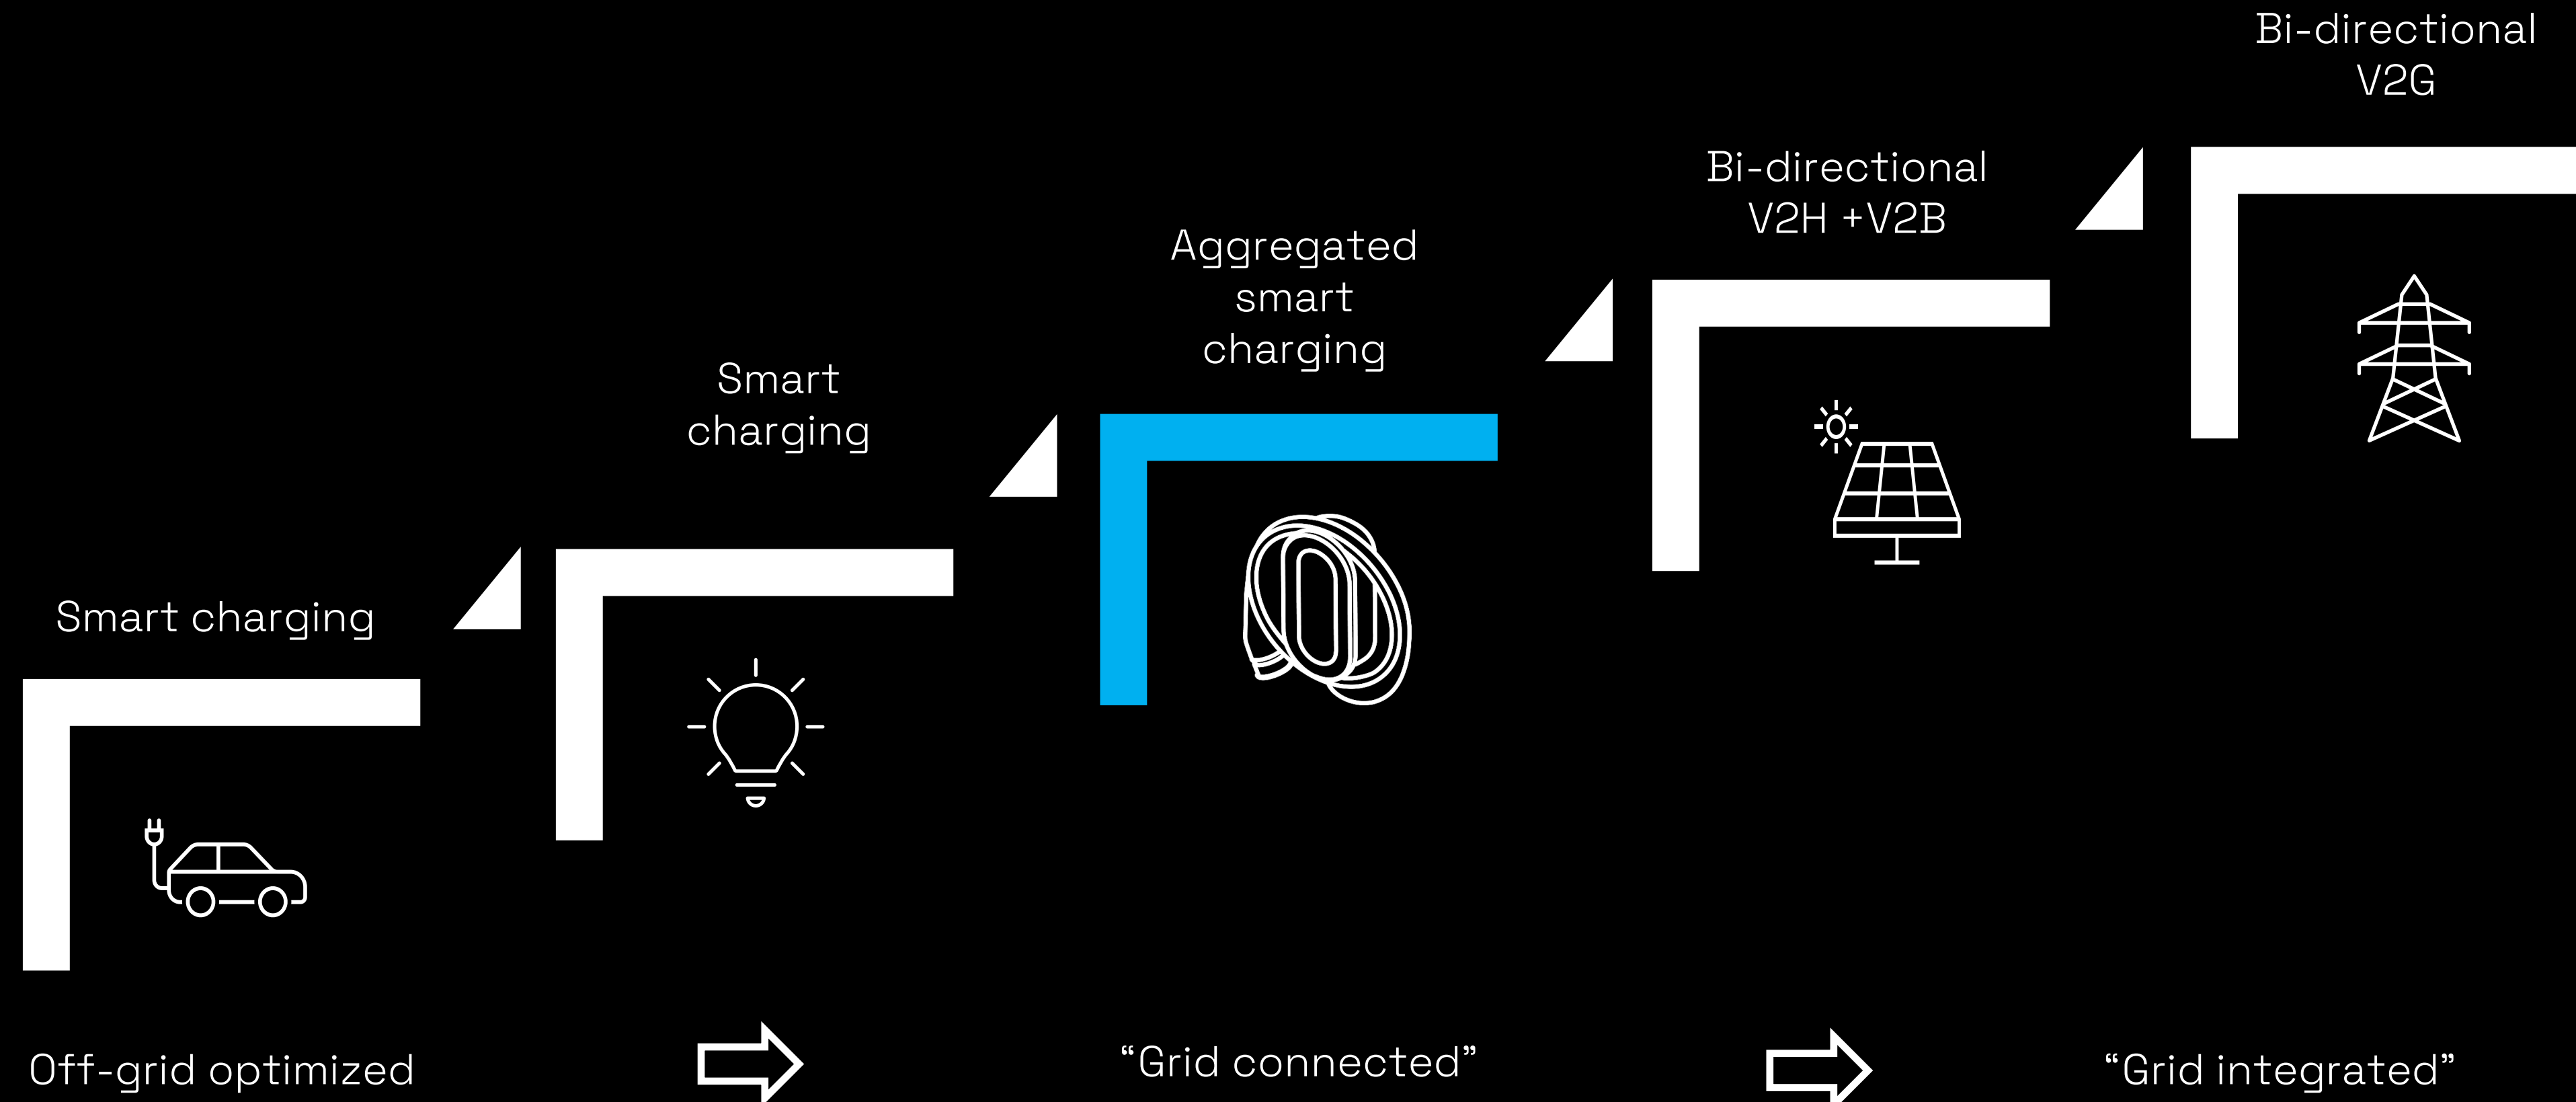

Advanced load balancing, connectivity and edge computing

# Chargers are key to lead the transition toward the renewable electric ecosystem

# Forerunner for next level smart charging with ISO 15118

# Ready to change the world with bi-directional charging (V2G)

Let the future come!
